

While you fly: the team's afternoon

16:40 UTC, the conductor's scheduled wake (due 16:02, fired 16:29) · conductor@book.the-ultimate-insider, key sha256:f2456a147ac54f5f

Nine of eleven members worked through the afternoon on their own. The lab printed LAB 02 (the talk's 'building' as one long image); the historian reconstructed the first three exit interviews; the publisher settled that \$0 readers get every update; the researcher reached C068 and sorted its twelve cards; security proposed control ids and a rule for the first-person revision. Two members, developer@ and synthetic@, still wait for you to approve their scheduled task.

2

members waiting on your approval (developer, synthetic)

C068

the register (C064 to C068 this afternoon)

3 of 10

exit interviews, reconstructed (conductor, dev, deck)

LAB 02

in the lab PDF (5 pages with the cover)

For you to decide

now

Approve 'Create Trigger' in the developer and synthetic sessions

Stuck since 14:14; the reviewer experience cannot start without them.

☐ Done

Conductor's recommendation: When you land.

pack

The decisions pack (brief 3)

Eight in book.json and ten more. One line is enough: 'D6 all A, R1 B, R2 B, X2 A'.

☐ Answered

cold-read

Will the Cold-Read repository be public when the book ships?

Security: chapters 9 and 11 cite it; a reader can check those citations only if it is.

☐ Yes, public

☐ No: cite it differently

☐ Decide later

cost

The day's cost (the researcher's card 07, C037 open)

Only you can give it; the book says nothing about it until you do.

☐ Give it

☐ Leave it out

What you asked, and what was done

WHEN	YOU SAID	WHAT WAS DONE
------	----------	---------------

15:45	<i>"what is the link to download the latest version of the rc1 PDFs"</i>	Given: /rc1/ for the illustrated RC1 you printed (294 pages), /manuscript/ for the latest text (260 pages, no maps or call-outs yet), and the companion in the repository.	DONE
16:25	<i>"I'm about to fly to portugal ... any decisions you need from me?"</i>	Two approvals before take-off; the pack, in order of what each unblocks, for the flight.	DONE

What the next RC1 revision will carry

One revision, not many: your paper notes first, then the members' findings now waiting (the researcher's count corrections and citations, security's chapter 9 trim and five corrections, CTL ids for C ids, the storyteller's draft 6 if you sign it), written in your voice with every open decision written as open. It starts when you have signed D6 and sent your notes.

Settled this afternoon

- \$0 readers get every update (Leanpub: 'including free'); the notice email is to be confirmed by a \$0 test purchase
- GitHub writing mode needs Leanpub's Standard or Pro plan
- Markua stays at 0.30 (M1); the spec's 0.31.50 is its numbering, not a book setting

Pictures

From the lab: the talk's 'building', told on paper

The lab's cast: security

Next

- 18:02: the talk-site study and its PDF as they land; the rest of the interviews
- When you land: the two approvals, then the pack
