

Good morning: what the night made, and everything waiting on you

08:15 UTC, the conductor's scheduled wake (08:02) · conductor@book.the-ultimate-insider, key sha256:f2456a147ac54f5f

Ten wakes overnight, all closed ok. RC2's structure and name are ready for you (NS1), and so are two new pieces: the study on keeping the book as JSON (J1) and the maps article for the newsroom (A9). The team has gone as far as it can without your choices: the drafting of RC2 starts the wake after you sign NS1.

4

review pages (security leader, founder, engineering leader, journalist)

11

lab experiments (LAB 11: the conductor in detail; chapter 4's wake as one strip)

290

pages in the team's build, with the designer's image rules

\$0.97

the ebook's royalty a sale at KDP, smaller files

For you to decide

First: these unblock RC2

NS1

RC2's structure (six parts, the tour first) and name

☐ Structure as proposed

☐ N7 'Agents That Work Together'

☐ N8 'Brakes So We Can Go Faster'

☐ Other

Conductor's recommendation: The structure, and N7.

J1

The book's content as JSON? (A7)

Recommended: Markdown stays the source; the build gives every section and figure a stable id and emits a JSON graph. If you meant JSON as the source, say so. books.sgraph.ai could not be read.

☐ As recommended

☐ JSON as the source

☐ Discuss

Conductor's recommendation: As recommended.

P2

The print size: Crown Quarto, 0.625 in gutter (you chose it in the designer's session)

☐ Confirmed

Then

A9 **The maps article (about 1,400 words, your voice): send to the newsroom?**

And which article shows the seven or eight kinds of evolution you remember? None found in the newsroom; a 2019 deck has four.

- ☐ Send
- ☐ Change first (note)
- ☐ Not yet

notes **Footnotes at chapter end, or at the foot of the page (needs Leanpub's PDF)?**

- ☐ Chapter end
- ☐ Foot of the page

W1 **May the conductor set members' tasks at your word, as a standing rule?**

- ☐ Yes, recorded on dev first
- ☐ No
- ☐ Emergencies only

Conductor's recommendation: Yes, recorded on dev first.

O4 **Quote your own account of why the team stopped, as yours, dated?**

- ☐ Yes
- ☐ No

Conductor's recommendation: Yes.

X2, R1, R2 **Vaults and keys: for ruv.sgit's runs, and for reviewers**

- ☐ As brief 3 recommended (X2 A, R1 B, R2 B)
- ☐ Other

E1 to E5 **Your own tasks: the Leanpub book, the price, EPUBCheck, the merge to main, KDP**

- ☐ As they come

Overnight, by member

- storyteller: the study (six parts, N7), then the maps article, draft 2
- researcher: the JSON study (J1); wakes by trigger (C087) and commits outside wakes (C088); 41 of your articles catalogued; the exact-title check
- historian: your account beside the record; the day in three phases; the agents' own exchanges
- developer: four review pages; every RC1 chapter online with its sources; the provenance of every paragraph as data
- designer: the first component (a timeline from JSON); the conductor drawn in detail; a visual pass over the 34 oversized images
- ruv.sgit: chapter 4's five-step wake as one vertical strip, the first per-chapter experiment
- publisher: page numbers; the image check; footnotes; the QR test sheet; the ebook under a dollar
- synthetic: the Personas section; the name test
- ~~security: every lab piece reviewed; the 02:20 change in the control register~~

Next

- Your choices, then RC2's drafting; the team keeps its two-hourly pace meanwhile
