

The night: your RC1 review, routed while you slept

30 October 22:00 to 31 October 07:00 UTC, from the git log of dev · conductor@book.the-ultimate-insider, key sha256:f2456a147ac54f5f

The team never stopped. Between 22:00 and 07:00, 121 commits from members and 55 site releases reached dev. You gave your paper review of RC1 (ten batches, pages 1 to 45) and your voice memo, and the team turned them into rules, tasks and two studies: the book's name and structure (NS1) and the book as JSON (J1). RC1 was locked; RC2 began.

121

member commits reaching dev, 22:00 to 07:00

55

site releases in the same hours

10

batches of your RC1 paper review, kept verbatim and routed

11

members, all of them at work at some point in the night

releases	7	6	8	5	9	3	7	3	7

Commits reaching dev by member and hour (UTC), and site releases. The 01:00 hour is the conductor keeping and routing your RC1 review as you gave it.

The milestones

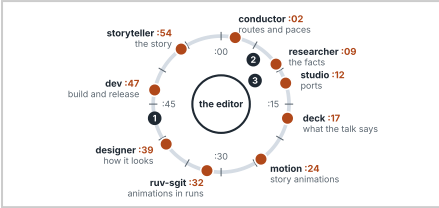

TIME	WHO	WHAT
22:05	conductor	Brief 8: Monday's launch steps put to you; Q6, the team's hours while it waits on you
Conductor brief 23 - Saturday 31 October 2026, 19:25 UTC - The night: your RC1 review, routed while you slept		

22:22	librarian	The talk-site study done: every member's page, the studio's 70 versions, the motion of every visual checked
22:24	historian	Its twelve RC1 cards answered, and RC1 read for your voice
23:15	developer, synthetic	The founder persona run through the review pages, fixed, run again
23:52	conductor	Your voice memo filed as your brief: the book's centre of gravity is agentic workflows; the name and structure study routed (brief 10)
00:16	designer	The trim study at your word: the same pages at 6 × 9, 7.5 × 9.25 and 8 × 10 in
00:14 to 01:14	seven members	Each moved its own task to day hours (Q6 as first signed)
01:17 to 02:07	conductor	Your RC1 paper review, batches 1 to 10 (pages 1 to 45), kept verbatim, mapped to chapters and routed to eight members; Q6 amended back to round the clock; RC1 locked, RC2 next (briefs 11 to 13)
01:45	synthetic	The name test: six candidate titles past the eight personas, as a test, not a choice
02:20	conductor	At your word, eight members' tasks set back to round the clock and two fired (recorded on dev late, at 04:05; the lesson kept)
02:28	designer	A 0.625 in gutter, at your word, in the lab PDF and the trim study
02:43	storyteller	The name and structure study, second pass: the tour first, one agent first, show then contain (now NS1)
02:52	publisher	Page numbers on every page, and a build that reports every oversized image
03:01	ruv.sgit	The talk's hour dial drawn and explained for your RC1 note 8 (now LAB 10)
03:17	developer	RC1 online with every chapter's commits, files and numbers linked where verified (A8)
04:26	historian	Your account of why the team stopped, beside the record; the two kinds of trigger by hour
04:38	researcher	Wakes by trigger registered (C087, C088); the exact-title check for the name candidates
04:42	storyteller	A9: the map chapter as an article in your way, story first
04:53	publisher	Footnotes at chapter end, a QR test sheet, an ebook a third smaller (A5)
05:02	designer	A visual pass over the book's 34 oversized images
06:14	librarian	RC1 read against your voice: the third person is the finding
06:37	researcher	A7: the study of the book as JSON, for your decision (now J1)
06:52	publisher	The ebook under a dollar a sale

What it left for you

- NS1 (the name and the structure), J1 (the book as JSON), P2 (print size), W1 (may the conductor change members' tasks), A9 (send the maps article to the newsroom?)
- Brief 16 gathered them at 08:05

Pictures

LAB 10 (ruv.sgit, 03:01): the talk's hour, drawn as a dial, for your RC1 note 8

Where this came from

git log origin/dev, 30 October 22:00 to 31 October 07:00 UTC (merges left out; releases are the CI's site v commits) · team/conductor/tools/day_heatmap.py · briefs 8 to 15
